## OPIOR'TCNITY.

Fre read it in the papers and live heard in song and story That theres never hat a simgle chance-one chance alone-for glory;

If you shond hap to oversleep or lail to hrar the rapping You'd just as well go hang youself-héll never more come tapping.

Now let me whisper in tom ear-I believe it's all a fake;
I rammot think that lesting so quickly will forsake.
lint every night and morning, with patient hand and trone, Hess tapping at four casement and beckoning to yon.

Le's wating 'romm the corner', he's waiting on the street; Fon'll find him 'romnd most anywhere if pou’e resolute and Hect.

I Oon't spend rom time in momming if yon think fonve missed his call;

Just hump fouself and hustle, and rou'll find lime, after all!
-Margaret Bur:hanan Veates in the I'ashington Star.

## CIVIC AR'T.

## MAY HAMPTON, '06.

America, in her wild rush for money and power, has, in the past, too nearly forgotten the importance of beauty. She has made rapid progress in the accumulation of wealth, and in the building up, of her schools, but has been content to leave her cities, as a whole, unadorned and unattractive. Recently, however, a growing appreciation of the beautiful has taken a strong hold upon our people and the work of improving and beautifying even the meanest things that belong to our complex city life, has been largely undertaken.

Almost everywhe, we see this transformation taking place. The cities which are perhaps foremost in this movement are: Washington, Cleveland, Chicago, Detroit, Minneapolis, Baltimore, New York, St. Lonis, and Kansas City. The movement is being forwarded by city officials, who are appointing commissioners to improve and increase park systems. Chicago has eighty-four parks, consisting of three thousand one hundred and sixty-nine acres, and connected by forty-nine miles of boulevards. This large park system is now being increased so that it will encircle the city. Baltimore's park system, when completed, will be one of the largest and lorliest in America. Even Boston, which now has the largest, will have to give the first place to Baltimore.

The city officials, howerer, are not alone in this work: there are many private orgamizations, such as Minnicipal Reform Societies, Municipal Art Leagues, Boys' Clubs, and neighborhood societies, urging this morement onwand. These small neighborhood societies are greatly improving the cities. They are planting on every barren place too small for building purposes, Howers, vines and shrubs, so that in summer the streets instead of being barren, will be bowers of blossoms.

There are still many examples of bad architecture, these usually being put up for speculation, but the majority of buildings, now being erected show a great adrance in civic art.

They are theowing oft their harn-like ngliness amd are beine
 is also an attempt being made bey the ('ity Home Association to improve temement comditions. ( Chicago has an organization which is drawing up plans for beantifying the eity in many resperets.

While these rities have done murh, yet everywhere, there rematius !undt to be douse. The ideal eite should be plamed before it is begun. The first streat and the first homses should be marle with an eve single to the city that is to be. The hombling of an ideal city would then be a less arduous task, as ereve step taken would be along amefully defined lines, and, therefore, one of progress. There is not an architect who would not huild with more zeal and taste, if he knew that his work was to fit into and carry ont a great and prearanged fan for a future beantiful city. The ideal to be attaned, the goal to be reached, would be an incentive for the best work from every ditizen foom the landscape gatdener and sonptor, to the common laborer, all carring out the phans of the architect. The adrantage of such a plan, is shown in the beanty of Waslington, the only example of a well-plamed city in the Enited States. It will require but a few years more to make this city the most beantiful in the world, as trachers say.

Howerer, we can, for the most part, work moder no surh ideal conditions. Onr towns have already been built with their sometimes narrow, crooked streets, and ugls, cramped buildings; ret even these can be made attractive. The so-called "ugly things" that are necessary can be greatly improved by making them harmonize with their smromndings. The rhief end of civie ant is to "clothe ntility with beauty," but not, as some one has said, by" "tying tidies on relegraph poles, and putting doilies on the cross-walks." Such buildings as public lamolries, warehouses, and livery stables, which are usually offensive to the ere, can be made artistic. A pmblic laundry in Cambridgeport, near Harrard Bridge, is built with as much "attention to detail as if it were devoted to something more dignified than the cleansing of linen." Just opposite, is a
large warehouse which can scarcely be called beautiful, yet it has a dignity which "raises it above the level." Just across Harvard Bridge are two well built and well kept livery stables.

Nothing of use is too humble to be made artistic. Even the street lamps, sign-boards, and drinking fomntains can be made attractive. In Boston, wherever sign-boards are allowed to be erected, they are ormamented with wrought-iron scroll work. A very attractive drinking fountain in Wrentham, Massachusetts, was erected in honor of the men of that town who fought in the French and Indian war.

Neighborhood societies can do much to have unnecessary bill-boards remored, waste lots improved, and back rards cleaned and beantified. In a certain town a family is much amoved by having a beantiful riew down a broad arenue cut off by an immense bill-board, with such advertisements as "Young Men Wanted," "Cascaretts," "Hood's Sarsaparilla." "Castoria, the most wonderful Medicine ever Made for Cihldren." and many others of the same character. In many small towns, racant lots are almost exclusively used for the erection of bill-boards. It is a common thing to see them, with their accustomed accumulation of trash and filth, on main residence streets by the side of beautiful homes. Sometimes a haudsome church or public building, will be fronted on the opposite side of the street, by an unsightly bill-board, with its flaring pictures and adrertisements. Instead of these lots being used for billboards, and the dumping place for rubbish, they could be made to serve a better and higher purpose, by changing them into small parks. In Durham, a prominent :itizen has changed one of these unsightly vacant plots into a delightful little park, by planting a hedge, some shade trees, and grass, and furnishing a few rustic seats and swings. The pleasure which this green and shady spot furnishes the children of the neighborhood, cannot be orerestimated. Not only are these racant lots neglected, hat the majority of the back vards are in no better condition. It seems to be a common custom to make the front yards beautiful while the back, although in most cases quite as public as the front, are left to grow up in weeds,
and to receive all the refose from the kitchen, such as bones, tin cams, broken plates, dishes, and the like. Some rear lots of public haildings are worse than residence yards. The condition of the back lots fronting the new million-dollar station in Atlanta, ( $e o r g i a$, is not only unsightly, but the odor, even in November, was mpleasant. The attractiveness, which can be given to back yards, is shown by the example of Dastom, Ohio.

This work of improving and beantifying our towns and cities is one which should appeal to every public-spirited man and woman. Clubs and organizations are necessary, and can do much, but these will mean but little withont the sympathy, appreciation and help of each individual citizen, for without their help the dream of the "city beautiful" can never be attained. If every citizen is made to feel that he is a factor in the improving and beantifying of his city, his public spirit and aesthetic sense will hardly fail to insist that the plan be carried out. Educationally, this will do more in a short while towards instilling civic pride in our children, than has hitherto been done slowly, and with labor and pains in our schools. "I do not want art for a few," said William Morris, "any more than education for a few, or freedom for a few, and civic art is essentially a public art."

The two following papers are class exercises in the Department ol English:

DOE'TRY: AN ESSENTLAL PAR'T OF A LIBERAL EDUCATHON.

RLEANOR 1). ELhiot
"The man that hath no music in himself, Nor is not moved with concord of sweet sounds, Is fit for treasoms, stratagems, and spoils. * * * Let no such man be trusted."

Thus shakespeare characterizes the mmusical person, and with equal point but with less severity, the same may be said of the man or woman who dislikes poetry-rerbal music. Not only do these miss much of the pleasure of life, but they fail to gain the full ralue of education. If the purpose of education is, as Plato says, "to give to the body and sonl all the beanty and all the perfection of which they are capable," or as spencer says. "to prepare for complete living," then poetry shomld he studied. An exact and yet comprehensive definition of poetry camot be given, but it may truthfully be called "an interpretation and very image of life, expressed in etermal truth, under the paramount control of the principle of beanty -a treatment in rhythmic form of emotions and ideals." He who studies poetry, will inevitably have his ideals of life elevated, will be drawn closer to nature and to God, and will reap) bountilul harvests of pleasure and profit.

It is hard to understand how one can fail to enjoy some of the productions of the masters, yet there are those who care nothing for even these, and who, were it possible, would destroy all poetry. They hold, that poetry is injurious to both mind and heart, that it unfits one for the severer work of professional study, and for the common duties of life-in short, that it is impractical, and sentimental. Such persons are to be pitied because they miss so many of the good things of life.

The expression of such sentiments argues either a total lack of imagination-that valuable golden touch which makes dull life endurable-or failure to find that kind of poetry which appeals to them.

There is a kind of poetry to fit every individual, every age, and every mood-"it is not for the few, but lor the many, for all." The rery natme of poetry requires that, for "it is the roice of all that is best in hmmanity, speaking from man to man." Happiness, wief, sarrifice, love-all find their edoes in poetry.

Not only is it miversal, lont it is likewise representative. So closely comnected with the inner life of a people, their customs, and character, is poetic expression, that frequently a clearerconception of a mation's history may be gained by a study of its poetry than throngh a mere record of events, no matter how alceurate. Could the growth of England be better demonstrated in any way than by a study of her poets from Chancer to Browning? For the student, no historical exercise would be more useful.

But the student's education is to be not only a theoretical knowledge gained from books. Interest in ideas is not to supercede interest in people and things. It is as an instrument for winning men and women back to love of natme-the world of things-that poetry is unequalled. "Niture description is not mere description of landscape in metrical form, but the expression of vital relationships between external mature and the deep heart of man." There is an indefinable something in verses of nature that appeals to the heart. Wordsworth and Shelley, as representatives of that class of poets, hold a pecuLiar place in English literature by reason of their power to see and to feel nature, and, by their verses, to make others feel the same. There are few who could read Shelley's "Ode to the West Wind" withont feeling a wild spirit of exultation, the mad freedom of the upper air, which most have prompted its writing.

Though the awakening of a love for nature is essential in a liberal education, of immeasmrably greater importance is the
arousing of a love for nature's Creator. Too often in the hurry and press of school work, God's service is made of secondary importance. It is one of the highest purposes of poetry to awaken slmmering love for the Almighty, and one for which it is peculiarly adapted, since rhythmic expression readily lends itself to the "subtlest and most mystical secrets of the human heart." No one can be a true poet or a true lover of poetry who does not have the love of God and man and natme in his heart, and the student who has not cultivated this love will bo hopelessly one-sided. The reader of poetry is silent before the majestic beanty of the l'salms, and even the puatetall man can find no weak sentimentality in the hearthealing words:
"(), rest in the Lord, and wait patiently for him!"
Besides the ethical ralue of poetry, there is a reason for its study that will appeal even to the materialist-the enrichment of the readers vocabulary, roice, and power of expression. The poets employ rare, concrete, musical, and exact words, which other writers mary well enry-and imitate when possible. There is an inborn if dormant element of melody or thythm in most of us, to which poetry appeaks, and in reading alond, this melody is awakened. Instinctively, the reader will learn to harmonize his roice with the selertion. Especially for the young student of poetry, memorizing quotations is particularly helpful. So often a line of poetry will express one's feeling better than anything else. The essentially compatet method of expression tends to easy memory : the epigrammatic form is convenient for repetition; and the maderlying truth necessaly for gemme poetry, finds many fitting occasions for use.

It has been said that the practical use to which poetry may be put is overshadowed by the greater one of dereloping the imagination. The power to rise above the annoyances and discouragements of life would be impossible without imagination. From this source comes "the stuff that dreams are made of"the material for our ideals. To poetry belongs the power of lifting us above the commomplace-and of keeping us out of
the rut of mere existence. It not only crates the faculty of imagination, but trains it when lormed. Instead of allowing idle fimbies, it prodnces definite, condrete images. It furmishes the mind recreation, relaxation, and watisfies one's lomging for escape firom the bondage of living. "oTis a sumease from all sorrows" that opens to the mind a vast domain throngh which if may wander, forever finding somothing new, something consoling, something stimmating. Poets are but the monthpieces of those to whom expression is denied, and it is these who derive the most satisfaction from its study. It may not seem that the pleasure-giving power or pootry is a substantial argument for its use in education, ret, this rely power is responsihle for its many other good effects. Some read poetry for enjoyment merely, and in the reading derive all the good that it is capable of giving. Abowe all else, it clevates the moral character and teaches men that "the most real things in the world are those that neither men nor children can see."

For these reasons we contend that poetry is of practical value in a liberal education. No other branch in any sehool (urriculum fimnisles what poetry does; from no other source (all we gain so much of inspiration, instruction, religious help. and comfort. Of no othere study ean it be said that "the solntions it offers are not worldy pay and success, not freedom from pain and work, but beanty--like the dawn of a sweet May morning; and peace-nke water on starry nights; and com-panionship--like a good friend for a walk in the woods; and the love of God-what friend that sticketlo eloser than a brother ; and the sense of never-ending life."

## WHY WE SHOULD STUDY POETRY.

FLORA THORNTON, "OT.
In the busy world of today we find many who consider the study of poetry a waste of time, who consider poetry itself one of the mnnecessary "frills" of life-an "impractical" thing, associated in their minds with romantic school-girls and the long-haired "poets" of the comic papers. There are others who are under the impression that a taste for poetry, as well as a genins for writing poetry must be inborn, and who beliere that since they cannot appreciate the deepest of Browning's poems as a first attempt at poetic reading they have no "capacity for poetry."

Before the question of why we should study poetry is considered let it be understood that the taste for poety is inborn, but not as we generally use the term "inborn." It is incarnated in every one of us. Every child is a poet-a poet who can create beautifnl romances with no better material than dolls stuffed with sawdust, and can find fairyland with no better guides than bits of broken china. Some one says, " $\lambda$ poet died young in every one of us." He did not die. In those who believe they have no "capacity for poetry," the poet is only sleeping. By the right kind of study he may easily be awakened.

It is not absolutely necessary that this poetic feeling should be aroused in one. A man may exist without poetry and spend his life happily enough, too. He may live in a mechanical fashion, contentedly enongh, practically without sentiment and with dulled imagination and feelings. But it is indeed a misfortune to him that he should pass through life without seeing the best and most beautiful part of it, without realizing the existence of the world of idealism and imagination, which contains the best of living. It may not be a duty to study poetry and to try to like it, but it is a misfortune that so large and so beautiful a portion of the world's literature should be lost to any reader.

Plato sals that the most important function of the poet is "Io keep alive the senses of a world that is out of sight," the world of idealism and imagination. The poet lifts us above our ererday cares and wormes into a higher world. He makes us forget the world as it is, amd canses us io live in the world as we would have it be. ln this higher world of poetry there is good and evil alike, lont the good is always supreme, and we forget the evil in the contemplation of the good.

Some say that this presentation of the idealistic and imaginative world is mot art. "Art," they saly, "mmst be real. It must present life exactly an it is-must hay bare all the weaknesses a man ran labe, most pressut mothing that is not, and camot be." lint, first of all, art must be beantifnl, and in the realm of beatry, poetry is sumeme. And after all, "the most real things are those which neither men nor children can see."

The contact with this idealistic and imaginative world of poetry elerates us. It strengthens our emotions, and brings ont the best feeling in us. It develops the imagination. It has the same am with Christianity, in that it tends to spiritualize ome nature. And indeed the spiritual, the emotional, the imaginative side of ins is as important as any other in the right kind of life. A man may know all there is to be known of the almost interminable "ologies" of science: he may have read all the history that has ever been written, and every dull volume of the "standard anthors," and if he has no imagination, no fecling, no sympathy for those abont him, if he has no idealism in his matme, he is mothing more tham a machine. A knowledge of mere facts may not hope to suftice for the support of the emotions and affections.
"But," the enemies of poetry will say, "why read poetry when so much good prose is being written? There is prose which excites the imagination, which deals with the ideal and the spiritual in life. Why not say it all in prose and do away with poetry?" Prose may contain the same thonght. but it can never attain to the splendor and beanty of poetry, and it can nerer make us feel so clearly what the writer intends to conrey. Fy the geamal movement or rithm of poetry, emotions
joyful or sad, actions, quick or slow, may be presented more exactly and beautifnlly than they can be presented in prose. To illustrate this point take the following quotation from Tennyson's "Passing of Arthur," where Sir Bedivere is bearing the wounded king to the ressel, which is to take him to "the island valley of Avilion":
"Iry clashed his harness in the icy caves And barren chasms, and all to left and right The bare black clift clang'd round him, as he based His feet on juts of slippery crag that rang Sharp smitten with the dint of armed heels-
And on a sudden, lo! the level lake,
And the long glories of the winter moon."

In the first lines of this selection, by the irregularities of the meter, by the almost laboring movement, we are made to feel for ourselves the effort with which the warrior carries the king over "the bare black clifi" and "juts of slippery crag." Then the soft sound and the regular flow of the words of the last two lines certainly paints for us a more beautiful picture of the "level lake," than could ever have been depicted in prose writing.

The one thing to be understood with regard to poetry is that the meter is the meaning of the poem, as much as the words themselves. Try taking any of one's favorite poems and turning them into prose, and it will be found that the verse is the whole life of them, and as prose they are practically dead. Imagine bringing out in prose the depths of feeling expressed in Tennyson's little song:
"Break, break, break, On thy cold, gray stones, O Sea!"

Such a thing would be impossible. Tho slow, solemn move-
ment athorded ly the meter expresses more liully, perhaps, the reeding of the pret than the words,
"O for the tomed of a ramishod hamd
And the somud of a voice that is still!"

Besides adidng in a clear and beantiful expression of feeling and thonght, the meter and rythm atfords that cham and music to poetry, which is, to one who loves the beatiful for its own sake, sufficient excuse for the study of poetry. To one who loves the beantilul, the regular morement and the soft music of the words in Temyson's "Claribel"-righty called ". Melody"-is sufficient reason for reading it:
> ". A ere the lecetle hoometh Ahwat the thicket lone; ( At noon the wild bee hmmeth
> Ahont the moss'd head stone; At midnight the moon cometh, And looketh down alone. Her song the lintwhite swelleth The clear roiced mavis dwelleth, The callow throstle lispeth. The slumbrons wave ontwelleth, The babbling rumel crispeth, The hollow grot replieth Where Claribel low lieth."

lerhaps no element of poetry is more beautiful and impresses us more deeply with the difference between prose and potry than description. There may be beantiful descriptions in prose, but in prose the descriptions are written out in full: every detail is presented, and there is no room for play of imagination on the part of the reader. The poet gives a suggestive word or two, and the reader imagines the scene for himself. And is not the picture resulting as deeply impressed upon the mind as that obtained from a prose description?

Certainly the mode of obtaining it is more delightful. Read any of the prose descrip,tions of loe, and theu see whether the pictures will be as decply stamped on the mind, as that of the same writer"s "dank tarn of Anber" and "ghoul-hamed Woodland of Weir," or that of Temnyson's

> "ramelot, built by old kings, age after age, so strange and rich and dim."

It is almost needless to say that by poetry the feelings may be aroused to an extent which can never be equalled in prose. Poetry seems to reach certain recesses of the homan heart to which prose has no access. For instance, prose writers may write long treatises on suicide, showing all the workings of the mind, but to understand how the suicide himself feels, to know his despair and to sympathize with him, we must tmen to the poet--to Hood and his "Bridge of Sighs":
"Where the lamps quiver
so far in the river, With many a light
From window to casement, From garret to basement, She stood with amazement Homeless by night.

## "The bleak wind of March

Made her tremble and sliver;
but not the dark arch,
Or the black flowing river;
Mad from life's history,
Glad to deathis mystery
Swift to be hurled-
Anywhere, anywhere,
Ont of the world."
Non one reading this, and seeing the difference between its effect and that of the most interesting of prose treatises, and
ask why we should study poetiy. No one who can to the shightest degree appreciate the beanties of matmre, can ask "What"s the use of poetiy? when he reads:
"The world is too muld with ms; late and soon, fetting and spending, we lay waste our powers:
Little we see in mature that is ours;
We have giren omr hearts away, a sordid boon.".

No one who remembers "Auld Lang Sroe" can question the importance of poetry when he reads:
"We two late rim about the braes,
And pird the gowans fine;
lint weve wandered many a weary foot sin and lang syne."

```
THE FATE OF A DREAM.
mlaf bittlle, 0%.
```

My heart was strangely free from care
And seemed to rest
Within my breast
As lightly as a hiod on air.
The slory of a canseless joy
Wrought magically
A melody
That seemed to be withont allor.
And so my spirit soared on high
Filled magically
With melody
And heeded not the reason's ay.
It heeded not, in waywayd fight,
That warning ery
Flung upon high,
"Thon'rt embodied ; thom must dight!"
At last in spirit I came to rest
On the monnt of fame,
Where a deathless mame
Is given to those, who reach its crest.
Then I looked on the sea of faces, uptumed
With wondering gaze
And words of praise;
And I tasted the joy ambition had camed.
'Tis gone; for that was resterday,
I learned last night
To see aright.
The dream no longer holds its sway,

```
J"s: reali%alion ramme at lask.
    On yosternight
    The dreall took tight:
My soml wols torm as with a blast.
Humbled was all self esteem:
    Matly I fonght
    But all for mamolit-
I could not fulfill the dream.
```

A roice that came from (iond knows where
Sitid solemmly,
"It rannot be."
And stragale calmed into despair.
1 Wondered what life conld mean to me,
With that dream gone
For which alone
I lived, and was glad to be.
But that is past : and now the light
Of this new day
Has chased alway
The little darkness of last night.
With rising sun has eome a beatm
()f light from Healem,
By the great God wiven:
And exposed the earthly in mur dream.
I'd dreamed a life of ceaselss strile,
To end in finne
And deathless mame
But I'd forgot the Lord of Life.

I sought to let my light so sinime.
That men might see, And honor me:
Not Gord: the glory must be mine.

Fut that is past, and the Moly One In His womdrous way
Has tanght me to say
With a smile, "Thy will be done."

## VANCE COHATY.

ANNEE MAY HENTER, 'OR.
In the fear 18S1, by act of the Legislatme, a new commty was formed from parts of Gramille. Warren and Franklin. This comty was mamed in homor of our "Wiar (Governor." Zebulon Blaird Vance. In 177! Franklin and Waren had heen formed from Bute which name had been diseontinned beramse of the hitter feeling towatd John, Ean of Bute, an emems to the American Canse. So zealous were these patriots, that they gloried in the fact that "there were no Tories in Bute." and made of these wards their slogan or war ery.

Bute and (iramville had been a part of Edgecombe. John. Lord ('arteret (afterwards Earl of (iranville, heir of Sir George ('arteret, one of the Lords lroprietors, retained his eighth portion of the provines of the (arolinas when the other portions had been sold to the crown. The following statement concerning the allotment of the eighth part. afterwats called Granville, is found in the Colomial Records: "And whereas. commissioners were aroordingly appointed on behalf of his majesty and of the said John, Lord C'artteret, to set out and allot to the said John, Lord Carteret one full eighth part of the provinces of the carolinas, who bey their hmmbereport to his majesty in comucil hearing date the sixth day of December in the sear of our Lord one thomsand seren hundred and fosety-three did certify that in pursuance of his majestres salid order in combil-they did immediately proceed to set out and allot to the said John Cabteret one full eighth part of the prorinces of the Carolinas, in one entire district, in one province of North Carolina, next adjoining and contigions to the prorince of Virginia." Edgecombe in twrin had been taken fiom (raven, one of the original precincts into which Bath had been divided.

Since the teritory of Vance is comtigions so that of Virginia, its early inhabitants were natmally Virginians. Among the Virginians that came to Vance were the Mitchells, the

Bullocks, the Satterwhites, the Hendersons, the Taylors and the Williams families. These people turned their attention to agriculture, which industry proved successful because of the good soil. "Governor Martin in 17T2 passed through Granville and Bute on his way from Hillsboro to New Bern and wrote of these comnties: "They have a great preeminence as well with respect to soil and its cultivation as to the manners and conditions of the inhabitants in which last respect, the difference is so great one would be led to think them people of another region."

In the northern part of the comnty is sitnated the historic town, Williamsboro, "which was one of the first three postal tows under colonial goverment in what is now the State of North Carolina." Williamsboro was never a business town lont rather a social center aromed which lived many wealthy and prominent families. Probably as many beantiful and stately colonial homes were to be seen in this section of the comity as in any other part of the State. About two miles from the town. where now Mr. Richard A. Bullock lives, stood Jontpelier, the home of Judge John Williams for whom Williamsboro was named. In 1745, Judge Williams, as a boy came to Granville from Virginia. "In $17 i 8$ John Williams. Samuel Ashe and Samuel Spencer were made the first judges under the state constitution." The next rear he became a member of the Continental Congress. The home of Judge Richard Henderson was also near Williamsboro. Richard Henderson began public life a deputy sheriff under his father. Samuel Henderson who was appointed sheriff soon after his arrival from Virginia in 1745. Later on, he read law under Judge Williams. Henderson was so well equipped for his law examination that he was soon afterwards appointed by the Governor, a judge of the Superior Court.

In 17t4, Richard Henderson, Leonard Hendly Bullock of Granville, with William Johnston, James Hogg, Thomes H:art, John Latterell, Nathaniel Mart and David Hart, of Orange purchased from the Indians a thact of land, including a large
portion of what is now the States of Tennessee and Kentucky. In this teritory they attempted to establish the Transylyan colony. The next year the governors of North rarolina and Virginia declared their purchase illegal, lont each granted to these men two thonsand acres. By his marriage with lilizabeth Keeling, a step danghter of John Willians, Richard Henderson had two danghters and fomr sons who followed in the footsteps of their father. Chief Justice Leonard llenderson was the third son. The following information was obtaned from an article written by the venerable $T$. B. Kingshury, who has been acrepted as authority on all subjects relating to the history and literature of our State. "Judge Leomard Henderson had a noble, generons, genial lovable nature, and was honest and honorable above most men. He deroted his entire manhood to the law, and won with dignity, amiability and honor its highest honors. In 1808 he was raised to the superior Court bench, and continued to preside until 1816, when he resigned. In 1818 the Supreme Court was created. when he Wat chosen one of the three judges, his associates being John Lewis Taylor, of Cumberland county, and John Hall, of Warren. In 180! Judge Taylor died, when Judge Henderson was appointed (hief Justice. He continued on the bench matil his death. Judge Fenderson for many rears taught a law school at his home, near Williamsboro, which was largely attended. Many young men who became distinguished lawyers and judges received instruction from this wise and good judge. and genial and amiable man. Among them were Judges Burton, Pearson and Gilliam, Gov. Burton and many others."

John Pemm, one of the signers of the Declaration of Independence, came also from Virginia to Granville and lived near Williamsboro. There he succeeded Richard Caswell as delegate to the Continental Congress. In Wheeler"s History of North Carolina is found this interesting incident in the life of Penn. "Watson in his Annals of Philadelphia states that a singular case of duel occurred in Philadelphia in 1778 or $\quad 79$ between Henry Laurens, President of Congress, and Mr. Penn. They

Were fellow boarders and breakfasted together the same morning. They were to fight on a vacant lot visa-vis the Masonic Hall on Chestnut street. Tn rossing at Fifth street, where was, then, a deep slough Mr. Penn kindly offered his hand to aid Mr. Laurens, then much the oldest, who accepted it. He suggested to Mr. Lamrens who had ehallenged him, that it was a foolish atfair and it was made up on the spot."

Quite an interesting character in the history of Tance countr is the negro John Chavis, "a Preshyterian Clergyman and a teather of the white youths of the old South." This negro is supposed to have been educated by lur. Witherspoon at Princeton, whether this is true or not, "it is certain that he was a fine Latin and a fair Greek scholar, and that he was a man of literary culture, of dignity, even of courtly bearing, and that he enjored the respect and esteen of the hest men of his day." Chavis preached in different parts of the countr. Ender his instruction Gov. Manly, Prof. J. H. Horner, father of Bishop Horner, and others were trained for the work that they afterwatds accomplished.

Not far from what is known as the Townsville neighborhood stands old Nut Brosh Church where one of the first eries for liberty was made June 3, 1765.

Lossing, in the Field Book of the Revolution, says:
"I arrived at Nut Bush Postoffice, a locality famous in the ammals of that state as the first place in the interior where a revolutionary document was put forth to aronse the people to resist the govermment." This reference is made to an event abont which Martin in his history writes as follows: "On the sixth of June, 1765, when the news of the passage of the Stamp, Act arrived in the interior of the province, a paper was circulated at Nut Bush entitled "A serions address to the inhabitants of the colony of Granville, containing a brief Narative of our beplorable Situation and the wrongs we sulfer and some necessary Hints with respect to a Reformation. The paper had for its epigraph the following line:
"Sive my comotry, heavens, shall be my last."

The parer was prepared bey an illitemate man lout it was son forcilly and cleaty expressed that it had a powerful effeet on the people. "Mratin, 11, 1! 7. ."

Within Williamsboro is looated St. John's Lpiscopal Phoreh. Tha geod people there bove to saty and they have beed told, that the fiamenork of their chmerh wats made in Englamd, atm that the brick with which it is maderpimed were honght over from England, ats ballast in the hold of the ressel. It is also sald that the chmed was oceupied ome night during the Revolution by soldiers watching for the eneme. Its interion is somewhat different from that of Episcopal 'lumenes of the present day. The barks of the pews are rely high, and a domwith its lock opens into each rew. The restry room is placed in the rear of the ehnech and not near the chancel.

Henderson, named for the family of the Chief Jnstice. on aceome of its convenient situation was made the comntre seat of Vance. According to the comoty records, this is the largest city in the world, for it is recorded as extending twelse thomsind miles, instrad of twele thomsand feet, in each direction from the courthouse.

## THE EARLY HISTORY AND sETTLEMENT OF HYDE COUNTY.

c.anrie v. NIMMON゙S.

Hyde is one of the oldest comnties in North Carolina. It is situated in the extreme eastern part of the State, and its present boundaries are the Alligator river and Tyrrell county on the north, the Atlantic Ocean and the Pamlico somnd on the sonth the Pamlico somd on the east, and the Pungo river on the west.

The original division of the colony of Carolina was into the two counties of Albemarle and Clarendon; the former contained the settlements around Albemarle sound, the latter that of the Cape Fear. There were then no settlements between the two localities. As people began to move south from Albemarle and settle in Pamlico county, Bath county was created. The present territory of Hyde was included in Batll. The necessity for the creation of the new county is told in an order of the Palatines court "holden at the house of the honorable Francis Jones, Esif., the 9th day of Hecember, 16!)6." In 1705 , the population still increasing, it became necessary to divide Bath county into three precincts: Pamptecough, Archdale and Wickham.

In 1711 the name of Wickhan precinct was changed to Hyde precinct, in honor of Edward Hyde, a monerless cousin of Queen Ame, who was made Colonial Governor of North Carolina. Dr. Kemp P. Battle, of the C'niversity of North Carolina, hest authority concerning the early and forgotten history of Corth Carolina, says that it is not known who Wickham was, for whom the precinct was named, but probably a Secretary to one of the Lords Proprietors.

A fact not generally known, is that Bath town, situated on Molines areek, the oldest town in the state and for five rears in the Colonial Days the seat of govermment, was at one time in the old Hyde precinct. It does not annen? neeeisely when

Pampterongh precinct was changed into Beanfort precinct nor does it rearly appear when this change took pare, where the dividing line between the precincts of Ityde and beanfort Wak established. It is certain however that the boundary of lbanfort precinct was extended far enongh, at least, to take in Bath town, located on the east and Hyde's side of Moline's reek, which was the dividing line between Hyde and beanfort precincts.
 ('ourt at Bath. In that real the Assembly in session in the old town of Edenton, "Among other improvements, as uniting the varions settlements loy roads,-established fixed localities in the several precincts, and ordered the erection, at them, of snitable public buildings for oftices and Courts of Justice. It Was thonght that one locality would sumice for Hyde and beanfort." This was at lbath.
"The last Assembly that ever convened in Carolina moder Iropurietary govermment met at Edenton on the ëth of November. 17丷天. This hody separated the precincts of Hyde and Beanfort in their Comrt system and directed a Court Honse to be louilt in the former countr where Woodstock now stands."
"In 17e! Hyde and beanfort were separated by Act of Assembly, for courenience of the inhabitants and by the same Art. Hyde was given power and anthority to locate and build a cont house at some convenient place, for the convenience of the inhabitants thereof." This was ly Act of the first Assemhly of the colonies of North Carolina, after the surrender of the Lords Iroprietors to the crown and approving by Act of Assembly the work done in Edenton relating to the separation of Hyde and Beaufort's Court system. The plate chosen was Woodstock, (now Beaufort rountr.) and there was situated Hyde county's first seat of government. It is not known how long it remained there. From there it was taken to Germanton. Afterwards it was for a time located at Lake Landing. and from there it was removed in 1836 to Swan Quarter, its presc: $t$ ?crat:on,

In 1738, Albemarle and Bath counties were abolished and each precinct of the colony made a comoty. Wre find then, that in 17:38 Hyde precinct was made a comty, and in point of age. excepting Albemarle, Bath and Clarendon, which were then abolished, is as old as any county in the State.

I'ntil 1745, Mattamuskeet lake and the comntive aronnd was separate from Hyde and probably was a part of currituck countr. By Act of Assembly passed at that time. it was made a palt of Hyde countr.

From time to time rarious changes were made in her boundaries but the last was in 1890, when all that part of the banks or barrier reefs, lying between the sound and the ocean. heginning at Hatteras Inlet and extending to New Inlet, was by Art of Assembly creating Dare countr, made a part of Dare. This Act left nothing of the banks to Hyde, except Ocracoke Island, which lies between Hatteras and Orracoke Inlets. This island is twelve miles long and one mile wide.

The early settlers of Carolina. about the Albemarle and lambico romitry, were English and French Hugenots. The Hugenots had come hither to avoid religions persecution at home. We are unable to ascertain the precise date when the first settlers made their home in what is now Hyde countr. It is probable that Hyde countr, then a part of Bath precinct was settled about the time or very soon after Albemarle countr. Hawks in his history on page 71 , says, "Cnable, howerer, as we are to trace with certainty the various exploring companies that risited Carolina, of one partionlar we are sure, that as early as 1656 , very considerable settlement had been formed from Virginia, on the northern side of Albemarle sound."

These first settlers found the comotry inhabited by three tribes of Indians; the Cores, ('utchmeys and Matamuskeets. These were fierce and warlike. They took part in the Tuscarrora war :and were the last who were brounght under subjection and with whom terms of peace were arranged. They lived principally in that part of Hyde abont Matamuskeet lake. Our ancestors bromght with them from the Mother Country,
the worship of the rharoln of Englamd. This religion, howerer, was mot abligatory ludeed we requet to note that of religion, there was hat little of any kind in the colonies prior to 17 ors, except among the Quakers over in the 'howan amd lerguimans comutry. In 1701, William of orange, then King of England, chartered the society known as the "Society for the Propagation of the (aspel in Foreign l'arts, and Inr. Hawks sars, "lt is the oldest existing lootestant llissionary Soriey in the world." "To this body, the Protestant Episcopal Churel in North America may be sald ehiefly to owe its existence." (xovernor Gloyer tells us, that on Trinity Sundar, 1706, the Rev. Richard Marsden administered the sarrament of the Lords supper, for the first time in North rabolina. In 170s, the society sent to the precincts of the Albemarle and Pamlico comotries, two Episcopal clergymen, the Rev. James Adams and William Gordon. The first had for his eharge, Pascuotanks and ('mriturk precincts; the latter, ('howan and Peroumans precincts. We camot learn with certainty who were the first clergmen the aforesalid Nociety sent to the prerinct of liath.

Among the laws, one in regald to religion was, that the Church of England was declared to be the only established church in C'arolina, and the province was to be divided into nine parishes. Chow: merinct was to contain two, sebarated from each other by Albemarle somud and Chowan river, and to be known as the "Eastern Parish" and the "Sonthwest Parish." Pasouotank was to have two, these were "Morth-east Parish" and "South-west I'arish" of Pasquotank, separated by. the Pasquotank river, Perquimans, Gurituck and Hyde precincts, each formed a parish, having for limits the bounderies of their precincts. Pamptecongh river and its branclies, commonly called Beanfort precinct, formed a parish and was named "st. Thomas;" and a parish by the name of "('raven P'arish" was formed on the Neuse river and its branches. To this last all the settlements south of it were to belong until a further division shotild be made.

There have been gradual changes from the old English system brought by onr forefathers to the colonies, matil we now have our present court srstem of government.

The early inhabitants of North ('arolina were divided inte different classes; the educated, who were generally allied to families of rank in England; those who had managed by shrewdness, thrift and superior intelligence to become rich, and from whom the Lords Proprietors usually selected their deputies; and the freemen, who were the ordinary and uninstructed immigrants. In England ther wonld have belonged to the peasantiv or agricultural laborers. Among this elass was another set, whose misfortunes had reduced them to a temporary slarery. These were the transported convicts who had been brought in and sold to the planters. Their condition was worse than any other of the white people in the colony, but they were much better off than the poor of Londen. 'They were bound out for a certain term of years, at the axparation of which they became full citizens.

The earliest record I have found of representatives of Hyde in any Assembly is of the delegates sent to the general meeting of delegates at New Bern on Angust 25th, 1774 . Hyde county sent Sammel Smith and Rotheas Latham. To the meeting at Hillsboro on the 25th of Augmst, 1765, she sent Joseph Hancock and John Jordan. To the Congress at Halifax, April 4th, 1776, she sent Rotheas Latham, Joseph Hancock, John Jordan and Benjamin Parmele. This body placed the State under military organization and appointed as officers for Hyde county, Rotheas Latham, ('olonel ; Benjamin l'armele, LieutenantColonel; William Russel, Major: Thomas Jones, Necond Major. Her delegates to the congress at Halifiax, the 12 th of November, 1776, were Joseph Hancock, John Jordan, Benjamin Parmele, William Russell and Abraham Jones.

The inhabitants of Hyde lived liar apart and there was only occasional intercourse between them. For many years the General Court and Assembly had no fixed place of session, and the meetings were often at the private residences of one of
the comselors. There was no mail service and all commmirations except her permal interomse had to he ber priate messenger:

This difticulty was felt bey the upper class but more so liy the servants and laborers. No white bondman conld leave his masters land but under such restrictions as amonnted to rirthal prohibition, and a hired laborer could not come and go as lie pleased. Sunday was the day of rest and treedom. but not even then could the people gather together at the phaces of worship, for there were no such phaces for many rears. The English hunter and the wild Indian were the only ones that did moch visiting. and they probably satw more of the inhabitants than any one else in the province.

Ocrasionally the well-to-do class came together and had a great feast. Everything was elegant and in great abmodance, and their style was ahost the same in every respect as in Englame, eren to the servants and livery.

The costmmes of the rich were the same as in England in the reigns of eneen Ame and the Georges. The common penple lived in comfort and were generally chad by the industry of the women of the province; for they made first the cloth and then the gaments from cotton, wool and flax.

The style of bildings were contimally improved until once in a while a house built entirely of brick could be found, and nearly all of the houses had brick chimners. When the people first immigrated to Americat the honses were nothing bat little log huts.

The amasemenis were dancing, wrestling, foot-racing, codgel playing, nine pins, shovelboirds, quoits, and cock-tighting. Ther also had two sports which were almost monown to the humble Englishman, fishing and hunting.

The women and children were a great help to the early settlers. They conld handle a canoe well, and the wives were always ready to help their husbands in any servile way. The girls were tanght to sew, spin, attend to the household affairs and dairy. The children of both seses were very docile and rery quick at learning. There were few, if any, good-for-noth-
ing ones amongst them, and insteat of wasting what the industry of their parents had left then, they improved and whded more to it. Ther were married when quite roung.

The landscape of Hyde county does not present a sublime picture. It is a low, hat country with two rivers, that of the Pango on the west, and Alligator river on the north. On the sonth is the l'amlico Fomd (in Indian language called Pamplecongh), extending also around to the east, and making into the land from the somnd are ocrasional areeks and bays; the chicf ones being Swan-Quarter baty, Ewasocking bay. In the interior are two lakes; a small one ralled New Lake in the northwestern part of the combtr, and in the eastern part is Mattammskeet lake, the largest in North ©arolina. This lake is filteen miles long and seven miles wide. It was once a rast Jumiper swamp, the botom of which, buried beneath the blatek mud, is a net-work, overlaid thickly with Juniper logs, stumps and roots. lu extreme dromghts when the water is dried up these logs, stmmps and roots, dry ont, and when the rany season comes on the hreak from their hiding places and are Washed ashore. This process has been going on for renturies and still the supply is not exhamsted. Also in the bottom of this lake, decul down under the mud, are ashes, charred and decayed. miniper, proving ronclusively that it was once a rast Jumiper swamp and burned into a lake. The waters of this lake are two and a half to three feet deep at present: while in the memory of the oldest inhabitans now living, it was from six to eleven leet deep and mavigathe. Its ontlet is thromgh Lake landing amal, cut by the state. The east, west and sonth shores of this lake are beantifnl dats or reefs, well grassed, making most excellent pastmage for stork of all kind. The lake is fast filling up from the wash of the soil around it and a gradual mulifting of its bottom. In it have formed serealal Islands, which are growing last and becoming higher land with each bassing rear. 'These islands are used hy some of the people as pastures. Tradition las it that Inatammseet lake was burned ont by the Indians and was thirteen moons in burning, Its name was
 once lived abomt its borders, and maly hate in the forgotlen past, moved about and hat their wagwams in the vast jumiper sw:ang, which stood where now rijple the waters of the bake.

Most of the thick, wootd forests of Hdye that were fombd by the ably settras have been cleared aw:y and translomed to rich ferbile farming lands. Howerer there ret remain some latere fatets of forest containing the primeval growh of pine, oak, hickory, eypress, juniper, blatk and sweed gum, maple, bay, and holly frees.

The soil of Hedo is among the richest fomblin the Ntate, and has alwats been so. Almost any rebry that call be raised in North Carolina can grow there if it receives the proper attention. The main rrops are coln, rice, cotton, wheat and oats.

The opster and fish industry is very profiable in Hyde. They are fombl in great abomdance in the bays and rivels and are consmmed to a wrat extent by the inhabitants.

There hate gone from her honndaries many prominent men. Comspicmons among these is George Washington Carrowath, the Baptist minister. Every reader of modern history in our surrombling combly has read of the Carowam-Lassiter murder trial. Want of spatce forbids me to further mention her noted men. Sultire it to saly, she has had her share ; in that respect she has kept pate with the other comaties of the state.

In some respects, especially in her growth, Hyde county has not kept up with her sister comoties. Among the canses which have retarded her growth is tronble with her boundaries. She is mainly an aqualtural romntry, and therefore there are no (ities and manfacturing pants. She has mo good water facilities except the sombl and her boundary waters, there being through the comoty no navigable streams, except what hats been made by the hamd of man. Moll of her tamsportation is done by means of these camals, with Elizabeth ('ity and other phaces. There are no railroads in the connty. There is a morement on foot now to open her interior mp by means of railroad. Leet us hope that this movement will succeed. This want of transportation facilities has both impeded immigration and encouraged eurgration to a great extent.

## (HAD)BOCRN.

M. L. BRON゙N.

Abont fifteen reans ago (hadbourn, a small town in the southeastern part of the State, did not exish. The place where it now stands "Was then a flat, swample eometiv covered with pines, scoubby modergrowth, and inhabited by all sorts of small game. The razor-hack hog and the down-eastern poorwhite man were about the only products of civilization to be seen."

Howerer, this comotry was not doomed to remain menltirated and uncivilized. Two men, Messrs. J. A. and R. E. L. Brown, went there and started a lumber and merantile business. They saw that by proper damange the land could be converter into a profitable trucking district ; so they began to experiment. They found that the lamd was best atapited for growing strawheries. However, men were lacking to eultivate it. Imbastrious Tar Heel farmers could not be induced to forsake their old arops of cotton, corn, and tobacoo to experiment in truck firming. Nince the farmers near by could not he persuaded to help cultivate this lam, the thrifty Northern and Western farmer was somght. More than $\$ 13,000$ was spent in advertising in the leading daly papers of New York, Massachusetts, lllinois, Ohio, Kowa, Nebraska, and adjoining States. This adrertising lat the desired effect. Answers came from all quarters. 'Twentr-five settlers were planted in 1897, and 275 more followed in the next lew rears. Several families drove from Oklahoma and Nebraskal in covered wagons. Among those who came by wagon from Oklahoma was a Mr. Payme, a man of seventy rears, who brought with him his wife, a grown son, three horses, two rows, and an old hen and chickens. Within an hour after arriving at Chadbourn, Mr. layne traded his extra horse for thirty acres of land, and pitched his tent. This man hewed logs and built a home. Today his holdings are worth $\$ 2.500$. The values on the land have greatly increased within the last ten years. The Browns

Cought 1,200 acres of land near Chadomm for sixty rents per arre, and after colting diteles through it, they sold it to the
 bonght now for less than $\$ 1.50$ per atere.

These "colomists," as they are ratled by the mative inhabitants of 'lad oum, struggled into the forests, cheared patches, planted strawheries and prospered. Today they live in beantiful combtry homes, and are fast becoming ricll. Hundreds of commission men go there erery strawhery season, and purdhase rat loads of berries for the Northern markets. The stores swam with negro berre pirkers who earn $\$ 1.00$ per dar. and some $\$ 2.010$. Last realr there were 1,700 cal loads shipped during the season, rasing (hadmomon to enjog the mique distinetion of being the langest single strantherry shipping station in the world. The revemues from the sales of berries alome
 pooducts grown for shipment, besides the stawhery, are dewberries, Irish potatoes, and letture.

In the line of mannationes. (Thadomon possesses a limber Pill, a crate lactory, which makes 150,010 crates ammally, lont not enongh to sumply the demand and an ice factory that is just being completed at a cost of woro,000.

There are two lorick buildings in Chathemen, the drug store and the hank. and alsw three pretty little chure hes, Presterterian, Methodist and Baptist. There is one large and commodions public sehool hoilding.

There are about 1.000 inhablitants in the town and they are industrions, religious, and well edncated. A well-selected and well-used tibary may be fond in almost arery honse. They are great "church workers" as well as "chureln goers." and are espectially fine smaliy-school attendants. In spite of the fact that the population is cosmopolitan, here inhalnitants hasing come foom the Sorth and Northwest, and also a few from New York, Pemsylania, and ramada, the people are very congenial.

## A APRLNG SONG.

('LALHRA NTELLA BLOUNT, ©Of.
Suringtime brings the alder tags and piping frogs at night;
In its wake come peach-tree blooms and plum trees bursting white.
Blue smoke curls up, from the fields, like sweet incense to God And wholesome earthy fragrance floats from upturned sod.

When spring is born, the heaven's more blue, the clonds of Heecier white,
And in the lengthened twilight hour, the stars shed misty light.
There are fresh joys and hopes aglow when birds are all awing And onr glad hearts leap of in us with the promise of the spring.

## A DREAM.

On September 17, before the awful news was told to me. I slept, and dreamed of Dr. Mefver. I saw his beloved face and form as clearly, and distinctly as ever in my waking hours.

As I lay sleeping, there came this drean to me.
My truest friend, a master builder, led me forth upon a mountain top, that, towering far above the clouds, was bathed in glorious light.

As there we stood upon this bare, bald, rounded mountain peak, alone, as on an island in a boundess sea of snow, bitlowy clouds, he pointed ont to me what I had not seen before. a great white structure, rising from this momatain top. Its walls were built of white blocks of parest marble.

We stood and looked upon the beanty and the grandemr of its flawless masomry, and as we gazed, we neither saw nor heard
 manship, but pure, spothess, polished as the shining sumw, semprfured into perfert symmetry, silently, slowly, each datzling hock was lifted bey invisible hands and fitted into plate. And so the shining walls rose higher and ret higher matil one half the perfect structure towered far beyond the power of my poor eges to follow.

The mfinished wall near where we stood, rose block hy bock, as a giant mablole stairway, leadmg upwad to the finished wall. Cpon the ground around us lay countless blocks for futme lmilding.

My dream was dhanged. My fiomd was gone. I stood alone, and darkness as the pall of night, came down bon the monntain top. The silence and the loneliness of an emptr world oppressed me.

From out the darkness, there eame these words to me, "I hate shown ron how. Complete the structure." My drean became a parable. The momatain top, on which we stood, was the view of life, to which my friend had led me. This glorions structure-his sombs ideal, he had brought me there to see. The finished walls, the parts which he had hailded. The shining, pme white blocks, were moble deeds of serviee for his fellowman. The mfinished walls, the parts of the master builder"s dream not ret fultilled.

My dream was ended. "I awoke, and, hehold, even as I dreamed, so was it. now that my sleep had gone."

My dream had been a proplecy and I understood. My friend, who oft hat led me up the mountain side of dutre and pointed ont to me new visions of the beanty of life and service. "ras gone. I stood alone. and the silence and the darkness of "a new and an awful loneliness" encompassed me.

Clear and true ring out the master builderes words to us.his friends. "I have shown you how. Complete the structure." One of Dr. McIver's Girls.

## WOMAN AT WORK.

Miss Mary E. Cutler owns the famous Winthrop Gardens in Holliston, Mass. From a farm which several years ago cost but a few hundred dollars, she is today drawing an'ammal income of sereral thonsand dollars. She practises intensive farming of the diversified trpe. Besides the ordinary crops, she cultivates shade trees, garden flowers and regetables. Miss Cutler is employed as a special lecturer by the Massachusetts State Board of Agriculture.

Mrs. Florence M. Lafin is doing a new but commendable work. She manages the woman's department of the Missomri Lincoln Trust Company. Her duties are to instruct women depositors in the details of opening accounts, making ont checks and investing their sarings. We have heard about the roung lady who, uron being informed by her bankers that she had overdrawn her account, wrote a note of regret and apology and enclosed her check for the amomet short.

Mrs. William Jemnings Bryan is an expert stenographer. She leaned the business that she might the more be a companion and help to her busy husband.

Edna Browning Ruby, of La Farette, Indiana, has attained high excellence as a textile desiguer. She exhibits with the most noted artists in London, New Vork, Plaladelphia and Chicago. A sketeh of her life should be read loy erery girl whose soul and fingers burn to make beautiful things. This sketch may be found in The Woman's Jommal of December $S$. 1906.

Many and varions are ways of the woman at work. One woman in New England is satid to make money bey ruming a cat farm. She makes a specialty of Angoras of which she raises 200 a year. These sell for from $\$ 10$ to $\$ 50$ apiece. Some jealous minded youmg man has called our college "in old maid factory." See the association of ideas girls? There may be
this congenial opening to some of our almmate to prove their indrepentence of matrimony.

A more allatation waty of earring at living exeret to those Who love eats, is that of Diss lanise ('headham, al dilkra, s. $\mathrm{I}^{\prime}$. She raises and trains mative song hiords. After all, the laising of eats seems the more womanly oceupation since the Angoras have their libery and ones heart is not tondhed as ley the imprinomment of the forest musicians. The yommg girl. Miss Aseh, near diken, who mises beagles for the market has the most profitable occupation of the three.

Lala B. Rossell, is a doral free delivery mal-rarier in Oklat homa and her sister Ihattie Russell has heen appointed her substitute. There are in the Cuiter States $2.0:$ women rumal mail carriers.

Diss M. Jemnie Kemball is the finst woman depmty sheriff in New Hampshire. She is the agent of the Woman's Hmmane Suciety of Nashmand has secured this appointment to emable her the better to prevent arnelty to animals.

Miss Lena Ham, a romg teacher. of Picton, Colorado. ran for justice of the peace on the Republican ticket last fall. She Was elected by a lange majority. She is but 20 but she conducts her court with dignity and justice.

Miss Mabel Acker has been appointed elerk of the Comet of Special Sessions of the horough of Richmond, N. Y.. to fill out the mexpired term of her father, deceased. She is just 21 vous of age.

Mrs. L. Flood Chamon is one of the two finger-print experts appointed by the secretary of the Nay to have charge of the system of identification of criminals lately adopted in the Navy Department. She was formerly a govermment elerk at $\$ 1,000$ a year.

Mrs. Margaret Selenka, widow of the noted Dutch scholar, has been chosen to lead a scientific expedition to Java; backed
by the Dutch govermment and the Berlin Academy of Science; to continue the researches of Dr. Eugene Dubois. This scientist found in Javal the fossil of an anthropoid ape supposed to be "the missing link." His theory was combatted lyy many scientists but was strongly supported by some, among them Prof. Emil Selenka and Mrs. Selenka who was closely associated with her husband in his scientific work. She had conducted valuable independent investigations of anthropoid apes and therefore she has been asked to head this expedition.

At a recent distribution of prizes in the art school of London Royal Academy, the lion's share of honors fell to women. John s. Sargent who was present at the awirding of the prizes remarked, langhingly, that the men would have to look to their lamels.

The Tennessee Legislature has passed a bill permitting women to practise law in that State.

Miss Marion S. Parker, a Detroit girl, and a graduate of Michigan University, is a civil engineer. She has done the architert's work on several New York skr-scrapers. She designed the Board of Exchange building in the Wall Street section, a 28 -story monster that houses 8,000 brokers, bankers and corporation oftices. She built the Astoria half of the WaldorfAstoria, the Whitehall building and a dozen other notable structures. She did nearly all the designing alone, planning the steel work and everything from sub-basement to roof.

## THE WVATHER MAN.

Where does the weather man live, monlere And where does he eat and sleep? bres he live up in the sky, Where the stals their watches keep?

Whes he ride in a fine balloon, mother. When he wants to go home to bed?
And does he go lyy himself.
Or has he a chum like Fred?

And how does he ever know, mother. If there must be rain or snow?
Or when the sum should he shining. Or when the wind should how?

And where does the weather man staly, mother, Is it all up in the sky?
Who helps him to bring it down
When he needs a fresh supply?

I want to see him so badly, mother. There's so much I want to know.
And then, if I'm very polite.
He smely would bring us some smow.

If I could just talk to him, mother, And show him my brand new sled.
You know he'd be nice to me, He world-L bet you my l.ead:

If he knew my birthday was coming, And coming in a week,
I beliere he'd guess what I want Before I had time to speak.

He'd call the cold winds together,
And bring lots of snow from the sky,
And spill it on the hill-side
And I'd have a fine time-womldn't I?
O. H., in Charlotte Olserver.

## CONCRRNTNG EDTCATHON.

New York City does not encomage lare marided women to
 is disturbed orer the fact that of the twelve thonsand women teachers, mame humbeds are married. Namy teachers romsult their own and-indedentally-their new lords comeniene alomi reporting al clange in their conjugal condition. Tha mariage of a woman teacher is a mase for discharge. Sirange to say the labrd may apmont a married woman as teacher. This amomaly exists probably to prove that consistency is the virtue of fools only.

Among those commmities which have raised the salaries of their teachers are Mimeapolis and Philadelphia. Formerly the latter city paid her teachers for their first rear \$tio. She has increased this pittance to one not quite so mean, viz: $\$ 500$. The increase will affect about 3, gion women and about 160 men.

In Buftialo, N. Y.. women school teachers get from $\$ 400$ to $\$ 700$ a pear, while men court criers get $\$ 1,200$.

Frederick T. Gates, of the General Education Board, sars women's colleges will receire first attentiom now that its income has been increased by Rockefeller's $\$ 32,000,000$. While the men's colleges are crowded, those for women are orercrowded. Vassar, Bryn Mawr, Barnard, Wells, Emira, Smith, Mount Holyoke, Radcliffe and Wellosley are the orercrowded institutions in sight of the Board orer which, probt ably, the oily surplus will flow.

The North Carolina State Teachers' Assembly will meet in Durham, June 11-14. It is said that the teachers. in a body, will, upon the adjournment of the Assembly, visit the Jamestown Exposition.

The State Board of Education has adopted hooks on North Carolina listory as follows: Hill's Young Folks' History of North Carolina for study and for supplementary reading

Stories of the Old North State, by R. D. W. Connor; Child's History of North Carolina, hy W. C. Allen; Old Time Stories of the Old North State, by Mrs. McCorkle.

This writer has for many gears expressed the hope that teachers might be jensioned, that these heroes of peace who have fought the good fight-for peare-who have struggled with difficulties; who have lived the life economical for longer rears than ever onr heroes of the 6os, might be remembered by the State when age and weariness overtake them all unprepared lor that rics irne of inaction. There is in our State get no promise of this righteons dealing, but it will come. North Carolina will, in time, see her duty to her hardest worked, poorest paid servants. Now and then there is a rift in the cloud and all teachers rejoice when this light falls upon the heard of one eren thongh it comes from beyond our borders and so many a pedagogue gives thanks because a North Carolina teacher has been pensioned. Rev. Thomas Hume, D. D., I'rofessor of English at the Cniversity, has been notified that a pension has been granted to him from the Carnegie fund for the adrancement of education.

## PCBLIC IIIGH SCHOOLS IN WIARREN.

There are five public high schools in Wraren country. That is to say, there are five districts whirh, by lerying a special tax, extend the course of study in the poblic schools to high school work and prepare prupils for entrance to college. The length of the school term in all of these schools is eight or nine months. These districts receive their proportionate parts of the public moner, and with the additional tax secure an income large enough to employ good teachers.

Wise High school, the largest of these schools, has an empollment of one hundred and twenty pupils. The special tax leried for its support amounts to one thonsind dollars. Mr. W. O. Dunn, principal, is a teacher of long experience and well qualified for the position. Three lady teachers are employed to ussist him.

Mr. I1. S. (imat is primeipal of Macon Acaldeme. He pmrsued a two sears erectio comers at the Conivensty, and has added to that training nearly five rears of experienere. A lady assistant is given him. The sperial tax for Maron Arandemy is six humdere and fifty dollats. The mumber of papils collooled is serenter.

Miss Mattio W. Williams, a leading member of the (lass of 1905 at the state Nombal and ludustrial college is prime pal of the selhool at Vamgham. The spectial tax in that district is fom hondrel and serenty dollas. One assistant tearher is employed. The momber of pippils emonled is sixty.

The Gakville sehool is in eharge of Mr. Herbert seloga, as prinejpal. He is a graduate of Elon College, and is doing good work in his position. The selool board also employs one laddy teacher: The special tax in that district is three hundred and fifty dohars, and the mumber of pupils forty.

Mr. R. T. Teague, with one assistant, conducts the Clmurchial school. The principal has had fourteen rears of experience. His record during these rears has been very creditable. The sperial tax for this selool is two humdred and fifty dollars, and emrollment os pupils.
frof. Jolm Grahams institution, Warentom High school, is located at the country seat, and supplies the need of a public high school in that part of the comuty. That school draws an emollment of serenty pupils from Warentom and vicinity.

The people of the combty are in aroord with the progressive spirit that is semding the great ware of educational enthusiasm orer the state, and the above is lout a chapter in the history that shall be writen herealter.

The above is found in the North Carolina Joumal of Education. To one who knows old Waren this gratifying condition is no surprise. Her people have erer been leaders in literary culture. Heretofore they have depended mpon private schools and even now in her county seat, that center of refinement and of education-beautiful old Warrentom, there is no publice sthool worth the name. She has for more than a cemtury been mote. for her fine schoois, but not one of these seats
of learning has been free to the people. There are boys and girls in Warmon today, the equals of any in mental capacity, who cannot improve their God-given powers becanse their parents camot afford to pay tuition fees. Dr. McIrer used to say that two lights in a room do not dim each other, but together they make the room brighter. So a thoronghly organized, well supported public school system in Warrenton will not be a let or hindrance to the rery fine prisate schools now Homrishing there. The public school is the most potent factor in the buidding of a town. It increases the value of real estate. It brings new people. It instils civic pride as no other agent call do.

Since writing the above, the following has been moted in the Journal of Education. It seems to come in prool of the assertion that the more lights in the room, the brighter the room. The Journal says:
"One of the most flourishing graded schools in the State, and one of which its patrons are justly proud, is that of Lenoir. Although the town boasts three other schools, and although the graded school is only three years old, its enrollment to date has been 180 . There are now ten grades in the school and nine teathers, exclusive of the superintendent."

The Legislature dealt generonsly with our College as with other educational institutions. Our annual appropriation for support is $\$ 70,000$, and for buildings $\$ 25,000$. The University gets the same amomet divided in the same way. This puts our two great institutions on a par, which is as it should be. All other schools aided by the State received increased apropriations. Two new educational institutions were ereated, an Eastern Training School for Teachers and the Spray School of Techmology. Success attend both is the wish of the Sarse Noralal Magazine.

## AMONG OHRNEANEN.

MII,LIAN (iliAl.

The rollege was risited the latter part of Jamany foy the educationit commitiee of the Legislatime. The purpose of theib risit was to ascertain the needs of the college. The students and fiaculty spent an enjorable erening with the committee as their guests. An address of weleome was made by Mena Datis, of the Senior class. The selections of the (ilee ('luh were also pleasing. Several of the committee were called upon to speak and responded. Some of the committee were present at chapel exerefes the following day and made brife talks. They were doubtless impressed with the enthusiasm of the students and with their sentiments concerning the establishment of an Eastern Normal College.

Mary sanford has spent seremal days with her sister, Mrs. R. F. Faucette, in Durham.

Martha Atlen has retumed to her home in Kinston, on acroment of itl health.

Mrs. IF. O. Furman visited her daughter, Amie, seremal days ago.

1'rof. T. Gilbert Pearson. formerly a member of our faculty. delivered a most delightfol and instructive lecture to the students on "The Habits of lBirds." Mr. Deanson illustrated his lectome with stereoption views. He will he wamly welcomed whenever he chooses to supplement this lecture.

We doubt if in any sulbect bronght before the college recently, there was as mudh instruction and inspiation as in the illustated lecture on "The National Yellowstone Park." Fehuary oth. This lecture was given by representatives of the Korthern lacific Ralway, who use pertaps the finest slides in the Conited states. We were never so impressed with the natural beauty of our own comatry.

During the recent suow storm, while skating under the eaves of the Curry Building a mass of snow fell from the building upou Eula May Blue, calusing painful thongh not serions injuries.

Elizabeth Le (awin is at a hospital in Wilmington, receiving treatment for appendicitis.

Bell Strickland has been called home on account of the illness of her mother.

The seuiors of the first grade in the latactice school, and the Bible chass of Miss Leah D. Jones, recently spent an enjorable erening with her.

The reception of the Sophomore class to the Freshmen is the chief social erent of the rear, omithing perhaps the initial tion. This rear the entrance of the Freslmen into the social life of the college and into good fellowship with their sister class, was at a novel and pleasing entertaimmeat, a "Mother Goose I'arty," given in the Main Building. The sourenirs were silver stick pins, oral in shape, with "10" prettily engraved on them.

It is but seldom that a musical genins includes Greenshoro in his list of favored places, but this spring has proved an exception to that rule by bringing to us some of the leaders in that profession. Xot since Mme. Rive-King delighted us two years ago have we heard a professional pianist of the first rank, mutil Signor Angelo Patricolo's concert, given at the college in lamary. To those who heard him any description would seem inadequate. To those who did not. this writer camot worthily present the subject. Patricolo combines mechanical excellence with great delicaley of feeling.

## ATHEETIC NOTES.

Athletic organzations are needfal in college, and the students recomize this truth. The season of baskethall is now upon us, and the prospects are brighter than ever before. Bas-ket-ball is a game that requires speed, agility and a great deal
 seldom latils to dran al elowd, which emeontases the platers.
 have rlosen their platers for the eoming tombament, and
 dome by these teams.
 ath. There was areat exritement when the "plosing teams
 the Freshman.

The games that have alreaty been plated hy the rasses, While bot showing the true strength ol the teams, were of great value to the inexperienced girls, but as a general thing the teams are eveuly matehed.

In regard to temmis, the work of this chul has been apred
 many of the girls arr taking an interest in this game. In May We are to have a temmis tombament. Each chass will be represented by two girls who will be appointed by a committee lionn the Assuriation, to fill this important position. ln conclusion, this organization desires the cultivation of healthful ont door exproises by all its members. We are striving to get all of onf members interested in some form of ont-doon exercise. A few of omm students dread the "walking period" and We believe it is those sturients who do bot eare for ont-doore games. We are working out a phan now for reaching these girk, wherel! they will look forward to this "walking period" with pleasure. The benctireal aflerets of athleties on women is readily seem. It is a case of the somud mind in the healthy body. In every wiy the modern girl is banefited by her derotion to ont-door sports.

Our last plea is that ron join the Association. We need you; you need us. sedan C. Werb, President.

## Y. W. C. A. NOTES.

The students, generally, have shown a greater interest in I . W. C. A. work this year than they have for several years. The payer meetings, as well as the prayer circles, are well attended. The devotional committee meetings have been especially well attemded. There are thirteen members of this committee and ten is the aremage attendance at the daily meetings.

At the election of officers of the Y. W. C. A. for the rear 190t-S, on Mareh 3rd, the following were chosen: Iresident, Rena Lassiter; Vice-Iresident, Ethel Brown; Treasurer, Mary Williams, and Secretary, Bessie Ives. These officers do not take charge until the first of April but they are busy. now, prepring for their work, aphointing new eommittees, ete. At the inaugmation of the officers, the first Sunday night in April. we hope to have with us the State Secretary of the Y. W. C. A.. Jliss Casler. One feature of our Y. W. C. A. that we would like to mention is the praver circle before each servire when the leader of the prayer sevice meets with the devotional committee. We have fomm that it works rery successfully and would recommend it to those associations that do not lave it.

Twelve Bible classes have been organized with about two hundred and twenty-five members. We have secured competent teachers for these chasses, some being tanght her members of the faculty and some by the girls themselves. The subjects studied are: The Life of Clmist. Life of St. Paul, Arts. and Genesis.

On Thumsday afternoon, February 21 st, the students had the pleasure of hearing Rev. Melton Clark, pastor of the First Presbyterian church of this city. He preached an excellent sermon from the text, "Come Orer Into Macedonia and Help, Us." Mr. Clark has come to Grcensboro recently but we like him and hope he may find time to preach for us often,

Hesides the devotional serviees and Bible rasses, whidh reach almost rery girl in college, ont Y. W. C. A. supports a foung laty from Brazil who intends going back to her home as a missionary. The association also contributes to the latermational board and to the expenses of Miss ('asler. Ontside of the usual contributions, it has, this year, hought wew hymu books and helped to pay the rent of the Smith Memoriar! Building where the comvention of the Yomng Woman's Che:s tian Association of North and South Carolina was heid.

Willie Wihite.

## ALUMNAE AND FORMER STUDENTS.

grice gill.
Mattie D. Williams is prineipal of the Vanghan pmblie school.
Louise Dixon is at her home in Hickory.
Sadie Davis is teaching in the Salisbury graded school.
Irma Ellis is teaching at Cary.
Nora Lentz and Helen Bamer are stenographops a:t High Point.

Clara Spicer is teaching at her home in Goldsboro.
Helen Hicks is teaching at Faison.
Hattie O'Berry is at her home in Dndley.
Sallie Hyman is teaching at Williamston.
Missie Sheppard is attending school at the Presbyterian College, Charlotte.

Nell Piper, Annie Belle Gattis and Susie Cox are sulstituie teachers in the Durham graded schools.

Kate Finley is teaching at Hickory.
Grace Tomlinson is teaching at her home in Wilson.
Douglas Hendrix is at school at the Presbrteriam College. Charlotte.

Lillie Wall is teaching near Wadeshoro.
Mabel Hanes is teaching at the Deaf and 1omb schoo!, Mor ganton.

Claudia Long is a stenographer at High loint.
Marion Moring is teaching music at Fremont.
Margaret Hossfield is teaching in Wilmington.
Martha Laird Robinson is now Mrs. Naomi Forbis, Greensboro.

## ENCHANGE DEI'AR'TMENT.

RENA G. LASSITERE.

If we seem serere in some of our criticisms, we would ask our exchanges to look, not at us, but at our ideals. To bring the college magazine up to the highest possible standard should be the ain of every one who works on the editorial stati of such a publication. Let us, then, help each other by pointing out what seems to us to be weakness as well as by applauding successes.

The Guilford Collegian is attractive magazine, and shows the grood taste of the mamagers. The poem on "Me and Andra" strikes a well known rhord, and makes one feel that "a man"s "man for a" that and a' that." There are several pieces of fiction, the most creditable of which is "The Lonely Cottage." and yet this is, in style and plot, rery similar to many other stories in college magazines. Do college students write of lost loves and disappointments-and sometimes of hopes realizedbecause they are susceptible to cupid's shafts; or is it because such stories are easy to write? "The Tramp's Story" is written in an easy, pleasant style, but we wonder why the "cow hand," as lie calls himself, became a tramp, and why he entered into such free conversation with a stranger. A little more attention might profitably be paid to the details of the story. "(renera" is well written and instructive showing study and literary ability. The only other article of a serious nature, "Improvements in the Phrsical Department." seems to have been written by one of the editors, and since it is concerned with the affairs of the college, we think it might properly be placed in the editorial column.

In The Eiskinian, a creditable publication that comes to us fiom South ('aroJina, we would riticise the quantity rather than the quality of the contributions. In reading "Uncle William and the College Boys" we are reminded that somewhere, and with a ditferent setting, we have seen the same
plot. It is difficult, however, to write of the old-time darkey without using the "type" of the "ante-bellum negro." And young writers are naturally influenced by the writings of others. The debate on corporations is good, but to print debates always seems to indicate a lack of materiall. The Alumni Department is the most interesting that we have noticed.

We are glad to welcome the first issue of The Acorn, the publication of the Baptist University for Women. In general tone this magazine makes us think of a dainty, pretty girl, in frills, ruffles, and ribbons. It reffects the gayer side of girls' college life, and the effect is light and pleasing. We recognize the difficulty of managing simple, everydar topics with success. and are guad to find the little sketches, "At Quaint House Party" and "An Alarm Clock," pleasing treatments of their subjects. In "Virginia [bare" we cannot help wondering where the maiden got "bhe skirts" and "soft white linen." If they were brought from England by her parents, would that she had left us her methods of makiug them "wear": "Horace Mann and Common Schools" is an instructive article, which shows thought and skill. "The Niobean Group" reveals artistic as well as literary ability. It is a careful study of this splendid work of art, and is well worth reading. The poems are worthy of commendation, and the editorial department is well managed.

The February number of the Philomathean Monthly is devoted to Abraham Lincoln. Perhajs we shall never fully realize how true a friend he was to the south. We are glad to see that our people are coming more and more to recognize his great qualities. The editorial department of this magarzine is not particularly strong.

The Converse Concept is an interesting magazine and contains much wit and hmmor. The story, "Their Hero," is delightful in its freshness and oriwinalitr, and is not "just like all the others." "Hearts and Flowers" is a good Valentine story. "A Tribute to Longfellow" and "The Part the West

Has Played in Literatme" are worthy of special mention. To the author of the artirle on "The Man in the Moon" we would say that we have recently heard a great deal about the woman in the moon, indeed, some one clams to have seen two men and three women there. While the roncept is interesting it would be stronger if the general tone were more serions and less emphasis were plated on the light and hmorous.

Besides om regulat rollege exchanges we acknowledge the following periodicals: Charity and Children, Our Fatherless Ones, Daily Reffector, The Progressive Farmer, The Teachers' Record.

## CURRENT EVENTS.

## MARIAM NORWOOD BOYD.

The great earthquake, January 14th, nearly destroyed Kingston, the capital of the island of Jamaica, a city of about 50,000 population. The earthquake was followed by fire, which swept through a part of the business section of the city and along the water from. Many people were killed by the earthquake shock or buried in its ruins of falling buildings. Hundreds of English and American tomists were on the island, but most of them appear to have escaped injury. A most interesting incident connected with this calamity was the ungracious conduct of the insular governor towards the American naval officer who extended aid to the suffering people, and the prompt reprimand of the English Government to her official.

The United States Senate, Jannary 10th, by a rote of 70 to 1 , passed a bill which had already been passed br the House, providing that railway employees engaged in the handling of trains, slall not work more than sixteen consecutive hours, which period must be followed by ten hours off duty.

Because of the agitation against the Japanese on the Pacific coast, the Japanese government has abandoned its purpose to send its training squadron to San Francisco. The squadron will risit Honoluln, but will go no farther.

The Russian government has made arrangements to build two 21,000 ton war vessels. The ships will be built in Russia.

Last year about $\$ 18,000,000$ worth of wood was converted into pulp in the United States. Since most of it was used for cheap printing paper, reading the newspaper is really a sort of nature study.

Not a single railway passenger lost his life in Great Britain in 1901 through collision or a derailment. One londred and ten passengers were killed in collisions and derailments in the

United States in the same period. In 1905 accidents of this class killed thirty-nine passengers in Great Britain and three hundred and forty-one in the United States.

Senor Pina Millet, a member of the statf of the foreign office in Madrid, has been elected to succeed Senor Cologan as Spanish minister to the United States.

On January !)th news rame from Sicily that Mt. Etna was showing signs of musnal activity. The next day it was announced that Mama Loa, in Hawaii, the largent active rolcano in the world, was belching forth fire and smoke in such volumes, that it could be seen for a hundred miles at sea, and on the same day earthouakes were reported in Norway and Sweden and in Michigan and Pennsylvania.

During the rear 190 property in the United States to the value of more than half a billion dollars was destroyed by fire. Of course this enormous total, which is said never to have been equaled in any comntry, at any time, was due in large part to the San Francisco disaster.

Arrangements for opening the Jamestown exhibition on April 26 th has progressed so far as the publication of the program of the opening exercises. Bishop Randolph, of Southern Virginia, will offer the opening prayer. Mr. H. St. George Tucker, president of the exposition, will make the opening speech and introduce President Roosevelt, who will make an address and then touch the electric button that will set the machinery in motion.

A Service Pension Bill has been passed by Congress, under which every honorably discharged reteran of the Civil War who served as much as three months is entitled to receive a pension of $\$ 12.00$ a month at the age of sixty-two, of $\$ 15.00$ at the age of seventy and of $\$ 20.00$ at the age of serentr-five. A provision giving survirors of the Mexican War a pension of $\$ 20.00$ a month was incorporated in the bill.

The details of the famine in China are distressing. It is estimated that $4,000,000$ people are actually starving. The native officials are doing all they can "to relieve the suffering.

Signor Giosue Carducci, the distinguished Italian poet, to whom the Nobel prize for the most noted work in literature was recently awarder, died February 15th in his 72d rear. He was regarded as the foremost Italian poet of his day.

A new alloy called McAdamite metal has recently been put on the market, with the idea that it may largely take the place of brass in machine-making. Its base is aluminum, but its exact composition is kept secret. It resembles aluminum only in lightuess and non-cormsiseness.

Mr. Rockeleller's gift of $\$ 32,000,000$ to the General Educational Board, added to the $\$ 11,000,000$ which he had already given, constitutes the largest single contribution of a philanthropic or educational work ever made by an individual and the largest sum of moner ever administered by any educational societr.

IN LIGH'TER VEIN. PATTIE VAlGHN WHITE. 

How dear to me heart i* the ca\$ of \$ubseription, When the generons \$uberiber presents it to riew.
lant of the one who wont pay I'll not give deseription For perhaps, gentle reader, that one may be rom. - Exchange.

## RECEIDT FOR "CURRENT EVENTS" DEPARTMENT.

Scan six newspapers. and then sift carelully into a mixing pan. Nake a hole in the middle of the mixtme, and sift into it the current event notes of several of your friends. Add six ounces of The Outlook, three gallons of Reriew of Reviews, and season with three spoonfuls of the Popular Science Montlrly; mix well, add enough inventiveness to make a stiff dongh. Roll into thin strips on the library table and then fasten in a note book for futmre reference.-Exchange.

## RECEIPT FOR A FlESHMAN CLASS.

Take a large number of girls, soak them over study hour in a strong solution of Latin and Algebra. Season them well with reminders of their own inefficiencr, and then dip each one into Art and Music crumbs, rolled fine, until they will take up no more. Place them in a hot science room, and roast them a delicate brown, turning them on all sides by sliding broad general questions under them. Serve them crisp and hot to the next teacher and so on. The result will be a briny tear salted product very pleasing to Sophomores.-Exchange.

```
A RECELPT FOR A SENIOR ESSAI.
```

Take a number of ambitions literary resolutions made in the Jnnior year. Turn these so that the hot fires of genius may strike them on all sides. When the resolutions ate burned to a crisp throw them in the ash barrel, they are only for the purpuse ul lesting the frem. Daring the fiast months of the

Senior rear keep the oven red hot with pine knots from the "Sonthern Poets," splinters from broken down "Ox-Carts," brlletins of" "ence Conferences," a few diplomas of the "College Woman," gentle reminders from the head of the English department and all questions, such as "What's your subject." A month before Senior week buy a large note book. Write three thousand thoughts in the note book and at the beginning of Senior week place this in the oren as additional fuel. Then allow the oren to cool. The last day of Senior week select a nice fresh subject, spread it carefully over the pages of essay paper and bake it in the cold oven ; season with salt water and garnish with a blue ribbon. A sance of red ink improves the flavor. P. V. W.

## OUR LATIN DEPARTMENT.

Senior H-Hare you read the Odyssey and idiocy?
Freshman-"Do please explain these nothing doing clauses."
The enthusiastic Latin teacher was talking entertainingly to her class abont the eruption of Tesurius and the destrucdion of Pompeii, when a little Freshman, thirsty for knowledge. said, "Oh, Miss M., was that what they called, "The Fall of the Roman Empire?'"

There was an advertisement on the bulletin board a few days ago-"Lost, A Flat Key." Perhaps the loser was a member of one of the Freshman vocal music sections.

Father-Johnnie, what are you making all that racket for?
Johnnie, pertly-So I can play tennis.
Father--Then you will need a bawl, too. Young man bring me that trunk strap.--Exchange.

Little Dorothy was saying her prayers. "Dear Dod bless mamma and papa and bless bottie too, 'cause every little bit helps."
"Do you hear me?" said the paper bag to the sugar. "I'm just wrapped up in you," replied the sugar. "You sweet thing," murmmred the paper bag.-Lx.

Literary Friend to Mr. Newly Rich-How true it is "That the jingling of the guinea lelps the hurt," ete.

Mr. Newly Rich-Well just to tell the troth, I never conld get much comitort ont of the chattering of a flock of guineahens.

Mrs. Halfhaked, a new member of the village litelary club, Was enlarging ubon her devotion to Raskin when some one asked her which of his works she most enjoyed. Jfter a moment"s hesitation she replied: "I think I prefer the equeen of Olives.'"

Girls, don't mistake that mahogamy instrmment upstairsthired floor right-for a sewing machine. Terborm sat sapienti.

```
Conld I a maiden know
Who went upstairs to sew,
I'd catch her by her pig-tail curd
And send her downstairs with a whirl:
Quoth he, quoth he, Just let my pianola be.
```

Vol. XI.
MARCH, 1907.
No. 3.

Life of Robert Edward Lee by Henry E. Shepherd, M. A., LL.D., New York and Washington. The Neale Publishing Company, 1906.

The lover of books does not read one because of its localism, but now and then we find one which holds our interest, because of its local coloring, so absorbingly that we forget its intrinsic literary excellence in the delight of revisiting familiar spots; of renewing old memories and in living orer the hope and gladness, eren the despair and sorrow of other days. Dr. Shepherd's Life of Lee is such a book. One who enjoys the untrameled flow of choice English, however, need not know the Sonth in the 60 's in order to spend self-forgetting hours while this book is on the library table.

Undying loralty to the South and its cause, intense love for Lee and for those who lived and sutfered with him is the spirit

Which speaks in avery line. To the writere, the lape of ford ratis has hat hrightened those memories. 'The condoring of the picture hats grown richer with time. The mande of those disfant roices hats gathered sweethess and rolnume with the eefocs.

Every sontherner will be stired to deepest reverence for Lee and for the sonth and the reader from ang sertion will be aroused to admilation who reads this charmeterization of the "foremost of the great generals who have spoken the binglish tongue." He shows combitions of thomght in 1stio. He tells of the spirit with which his alma mater, the lairersity of Virginia, was stirred and states that the same dominated every school from that one to the Gulf. "The rery flower of our fonth was intoned with the teaching which is the key to the position of the south logically and historically during the fonstitutional struge for the maintemane of her own independence. We were able at least to remder unto every one that asked us a reason for the faith that was in us." $\quad$ * * "As in the sphere of perfect reason, doubt has no place. sn in the contemplation of the typical Southern student of 1861, it did not exist." He emphasizes the truth that our Southern armies werr composed largely of these students, the choirest Hower, in this new land, of the old English stock. Of Lees army, he says: "It was the goodliest fellowship whereot the world holds record." $\quad * \quad * \quad$ So far as I am awiare, there is no instance on record of abose or insult inflicted upon a Woman by a regulanly enlisted soldier of the Army of Northern Virginia. * * * There were in the ranks of Lees army without even a dream of preferment to neve their energies or kindle their courage. men who had received the degrees ol' European centers of culture, who had studied at Bomn, Gottingen, Berlin, Ldinburgh. " $\quad *$ Erery American institution from Harvard to the frontiers of the South was represented upon the rolls of this incomparable host. College professors mingled with college students at the mess and in the camp. * * * Thiversities, colleges, the old classical academies, all pormed out their hosts of aspiring and eager stmdents, lads of sixteen and youths who had barely attained to
legal age. * * * There was Sidney Lanier, upon whom death had already set his seal, then a lad of nineteen. There, too, was M.Crady, of South Carolina, who passed into light almost simultaneonsly with the attainment of assured renown as the historian of his own State. There was Pettigrew, of North Carolina, who fell in the mere dawn of his rare and rersatile power. * * * All the muses seemed to smile upon his cratle. * * * While being carried in an ambulance to the point at which he died, General Lee rode up and, with a gentleness worthy of womanhood, expressed his sympathy, imquired mimutely as to his condition and leaned with characteristic tenderness over the form of the fast-fading Carolina hero." * * * "Among all its raried and diverse trpes it never revealed to the eyes of the world a rarer personality than that of m. teacher and commander D. H. Hill. * * * The intensest fire of the southern nature burned in the heat of D. H. Hill. * * * His absolute unconscionsmess of danger was enongh to thrill the ordinary brain with a sort of vertigo as it revealed itself in the most phenominal situations or supreme crises."

Of Col. Thomass. Keenan, commander of the Forty-third North Carolina Regiment, in which Dr. Shepherd served, he speaks as "an accomplished gentleman and soldier associated with the purest and highest ideals of the old South." Of Gen. Junius Daniel, of North Carolina, as "a graduate of West Point and a capable and efficient officer:" Of Gen. W. D. Pender he says: "His (Jackson's) last command addressed to that brilliant and accomplished soldier, Gen. W. 1). Pender, of North Carolina, has always seemed to me like a spectial admonition, if not an unconscions propheer designed for the people of the South, 'ren. Pender, you must hold your ground you must hold rour ground.' Two months later Pender himself fell in the forefront of the battle at Gettrsburg. It was of him that General Lee said: 'If pender had remained in the saddle half tan hour longer we should have carried the day." "

Besides these, there is a long array of men who have proved themselves to be as great heroes of peace as of war. This
resume wonld be too long even to mention all and those are selected who are best known in our state. Among them is Robert Bingham, Randolph McKim, Mceabe, Hemry A. Wise. Bishop Jos. B. Cheshire-of whom an ammsing but chatacteristic anecdote is told; Capt. Jos. J. Davis. who, while a prisoner at Johmson's Island, tanght Blackstone to a law elass of his fellow prisoners; Judge C. H. Simontom, who did the same work while a prisoner at Fort behware; our wat gowernor Yance with a joke following according to matme: James $\mathbb{W}$. Huske, of Fayetterille, whose last words were: 'lom’ithp for me, go ahead,' to his commades at Hatcher's Rim.

The temptation is strong to quote Dr. Shepherdss stors of the many who performed heroic deeds which if done in Xianleon's army would have won a manshal's batom, but in this litfle host they passed as but the natmal comse of erents. Gemeral Lees som, Robert Edward, served as a private amd was not recognized by his father when they met upon the tiehl of Sharpsburg, so corered was the boy with the grime and smoke of battle. But Lee was not tainted with nepotism. "Not one of his soms was upon his staff nor advanced in mak loy his agency or suggestion." His soldiers fonght for the cause, for the South. "Every man felt that he in a measure carried the canse of the south in his bayonet. * * * From sovereign chief' to humblest rank and file, from 'Marse Robert to the low liest private, the sense of persomal responsibility and individual manhood was all prevalent. * * * Lee, Jacksom, 1). H. Hill lired ever in the (areat Taskmanter*s eye'; life with them was a ceaseless consectation to the service of Gool. It was in a measme inevitable that their pore and derout convemation shond mould and fashion the moral tone of the men ther led." The lore of Lee's soldiers for him was boundless. "The Gemeral had fallen asleep by the roadside fatter Gettysburg) as the army minfomate but unsubdued was passing by its adored chief. * * * The news spread like magic along the line that General Lee was asleep. At once all soldier boisteronsness and uproar hushed into stilness and the troops moved on with 'measurelss tread, like the step of the dead,'
while their commander was enjoring his grateful rest." The humblest private felt assmred of Lee's sympathy and aid and there are incidents related in the hook of their appeals to him in times of personal stress. Mamy of the jests, jokes and rollicksome escaparle of Johnny Reb are related with a zest which charms the more because one hardly expects to find them on the pages of our great Linglish scholar. No picture of our sonthern defenders would be complete without this light, for as the writer sars: "No army was ever more pervaded by a keener perception of the ludicrous or auimated by a more intensive sense of humor. This characteristic they possessed in common with their chief, for Lee's appreciation of the ludicrous was quick and penetrating."

Along with the army, Dr. Shepherd reckons the women of the Confederacy as an element in the undying glory of the canse. "To the women of the Confederacy, whose faith has never faltered, whose zeal has never grown cold, even though men have proved recreant to the canse; whose heroism elicited the highest admiration of Lee, I dedicate this volume, in the hope that it may live with the memory of their glory and the eternity of his fame." Not only his own estimate shown in this touching tribute to them, but he presents Lee's expressions of admiration on many pages. He mentions the "significant and anspicious fact" that one of the first monuments in the South was erected by women, those of Warren county, N. C., to mark the grave of Annie Carter Lee, who died October 20 , 1862, at the White Sulphur Springs in that county. In relating the impressive ceremonial of its unveiling, he says: "The best life of the South was represented there. The incomparable women of on land were the inspiration of the movement." As illustrating the spirit of the Southern women he quotes the invitation of the committee on the monnment to General Lee: "Throngh the kindness and merey of your hearenly Father, four gallant sons fought the good fight even to the end, and ron were spared amid the shork of battle and its horrid carmage for fom long rears. Spared to us, a grateful people who feel linked to you in the closest ties of friendship
and the rlosest bomds of sympathy. We rammot honor you with too deep a reverence, nor lowe ron with ath affection foo pure and ferrent. Yon have alome in every heart, a welcome in every honseloold and the whisper of yome name echoes a thonsand hessings upon roll amd pome.".

The Ode written for the oreasion by James Barron Hope, of Norfolk, Virginia, and which lra. Shepherd calls a masterpiece, is inserted in fall. lor. Shepherd had ridden twentr-five mies arross the comatry to pay due homor to the daughter of his chief. One of the most appealing incidents told in the book is the risir of Gemeral Lee with his danghter Agness to Annie's grave, which thongh far foom the beds of her own is even to this day kept green by the descendants of those who nearly a half century ago lad her so tenderly there. The southern Women hare kept the faith. When (remeral Lee acoomplished He long-olerished wish to stand beside his daughters grave. the night of death was chosing aromod him and he knew it. A few days later he stood at his fathers grave in Georgia and then tmmed his face toward the hills about Lexington where six months afterward he "athered the drapery of his conch about him" for the long-nceded rest, for Lee died of a broken heart.
buring this trip to the sonth on every mile of the way he was greeted with the applanse, the glad welcome, the reverent love which are often yielded to conquerors but never before in so binlimited meanme to the hero of a lost canse. When Lee entered a home, others said to its owner: "Your homse is forever honored." Ohd st. Michatels in charleston has an added glory since the day when "Lee sat in Washington's pew." Not only his own people but the world today says with President Rooserelt: "He (Lee) was withont any exception the very greatest of all the great captains that the English-speaking peoples have bronght forth-and that althongh the last and chief of all his antagonists may cham to stand as the full equal of Marlhorongh and Wellington." In smmmarizing Lee's achierements, the book says: "Lee's final struggle from Petersburg to Appomattox takes rank not merely as one of the fore-
most achievements of his own genins, but is conceded an $d$. sured plate among the most brilliant episodes in the records of modern warfare. Nine thousand starving men rielded the jalm to 150,000 who had never known want, to whom gaunt hunger was a myth."

Of Lee as a husband, father, teacher, friend, citizen, Inr. Shepherd has not merely expressed his own opinion. He. fills his pages with incidents from the full, rich life of our peerless chief. He shows his gentleness, simplicity, love, firmness, judgment, courage and fortitude. His last rears were filled with service for his invalid wife. She had suffered long and once when he was at the front weighted with the care of a nation's fate, he learned that she needed lemons. He set out to find them and secured but one or two besides one old and dried, which he had in his knapsack and which also he sent, hoping it might be used. He was happy on the same occasion to find a few apples for her, this bride of his youth, the heiress of Arlington, and to whom Lee was ever a lover. When at home. he supervised his children's lessons, and when absent from them his letters were filled with words that make glad the heart of a child. There was no renom in his mature, no bitterness for his enemy, only lore for his own cause. When in Pennsylvania, a romng gill flamed the Stars and Stripes in his face. He saluted the flag and rode on withont a word. Is it a wonder that the Federal soldiers cheered him to the echo in the streets of Richmond when they saw his figme at a window?

As the President of a College he left no duty to others which belonged to his office. He was never absent from the morning religions service. To each student he was the presonal friend as he had been to the boys in grey: He entered into their hopes and plans and not one dreaded to appoach him except the eril doer.

His last service was as a vestroman when he presided at a meeting and gave the sum needed, $\$ 100$, on the Rectors salary. From that vestry room, he went to his bed never to arise to
mortal eye but very soon to aseend to the hearen of heavens in the fullmess of pealee and rest.

No girl or bor, no man or Wonan, ran ratd this Life of Lee without being stimulated to live the higher life, phesically, mentally, morally. No knight of the romnd table was more loftr, hat he lived, than this real prinee among men. No Arthmian legend cam more quirken the moral sense nor hold the beantr-loving mind than the trone story of this thatess man, Robert Edward Lee.

The mechanical make-np of the book is most attractive. As is fitting, the cloth binding is confederate grey. The print is good and the paper of excellent quality. The illustrations from photographs are clean and clear. They show many members of the Lee family, their homes, and several of the great chief.

## MADAME SEMBRICH.

The Sembrich Concert was an event in Greensboros history since celebrities of her caliber do not usually visit "small cities." The town is indebted to Mr. Herman H. Hoexter, of our faculty, for the privilege of hearing her, one of the great singers of today. Yet more even than the ritizens of Greens boro are our students to be congratulated npon her presence among them, for she made the college a charming little visit. Her keen personal interest in the girls, her wish to know all about them, their work, hopes, plans, was earnest and womaniy, winning for her many young hearts as her superb voice and skill win the applanse and adomation of all who hear her sing. Men and women who acknowledge that they know nothing of the highest order of music, say they were swept off their seats. out of themselves, in a transport when they heard her. One of our girls said: "I never can be happier and I wanted to die before I came back to earth."

She was received at the college by the entertainment committee and shown the buildings and grounds. The ringing of the big bell brought the students to the chapel. Mr. Fonst welcomed our illustrious guest in a lew words. She conld not make a speech. "I no speak good English," she said but she did better. She went to the piano and to her own accompaniment, she smog in her native Polish, Chopin's "Maidens Wishes" as only she can sing it.
